Christopher Johnson

Software Developer | Full Stack Engineer | Tech Innovator

📧 causefx@me.com | 📞 623-734-5966 | 🌐 https://azcfx.com | GitHub: github.com/causefx

Professional Summary

Innovative Full Stack Developer with a strong background in software engineering, open-source development, and team leadership. Creator of Organizr, an OSS application with 200M+ Docker pulls and 4,000+ GitHub Stars. Adept at building scalable web applications, optimizing infrastructure, and leading cross-functional teams. Passionate about automation, cloud technologies, and DevOps. Seeking a role where I can apply my technical skills to drive innovation.

Technical Skills

- Programming Languages: PHP (Laravel), JavaScript (Node.js, Next.js), Python, HTML, CSS
- Cloud & DevOps: Docker, Kubernetes, CI/CD, AWS, DigitalOcean
- Frameworks & Tools: React.js, Vue.js, Express.js, TailwindCSS, Bootstrap
- Database Management: MySQL, PostgreSQL, MongoDB, Firebase
- Automation & Infrastructure: Ansible, Terraform, Bash Scripting
- API Development: RESTful APIs, GraphQL, WebSockets
- Project Management: Agile, Scrum, GitHub Actions

Professional Developer Experience

Lead Full Stack Developer | MOD | 2023 – Present

- Lead the development of scalable web applications, optimizing system architecture.
- Spearheaded API integrations and cloud infrastructure improvements.
- Managed and mentored junior developers, implementing best coding practices.
- Acted as the interim Engineering Manager, overseeing project roadmaps.

Founder & Open Source Developer | Organizr | 2016 – Present

- Built Organizr, a highly successful open-source project with 200M+ Docker pulls.
- Designed an intuitive dashboard interface for self-hosted services management.
- Integrated advanced authentication, API management, and containerized deployment.
- Maintained an active developer community and provided open-source support.

Full Stack Developer (Freelance) | 2008 – Present

- Designed and built custom web applications and automation tools for various clients.
- Developed and maintained e-commerce platforms, inventory management systems, and business dashboards.
- Worked with modern frameworks like Next.js, Laravel, and Vue.js.

Warehouse & Logistics Management Experience

Operations Manager | Del Monte Fresh Produce | 2004 – 2006

- Started as a Shipping Clerk and quickly advanced to Shipping & Receiving Manager.
- Promoted to Operations Manager within 6 months, overseeing a 50-person team.
- Managed logistics, inventory, and warehouse operations to improve efficiency.

Warehouse Manager | Inventure Foods | 2006 – 2012

- Supervised a 25-person warehouse team, optimizing daily operations.
- Implemented inventory tracking systems, reducing discrepancies by 30%.
- Managed labor costs, warehouse logistics, and team productivity.

Distribution Manager | Barrel O' Fun | 2012 – 2017

- Led a team of over 35 employees in a fast-paced warehouse environment.
- Oversaw shipping, receiving, and raw material inventory control.
- Developed and enforced process improvements that reduced errors by 20%.

Certifications & Training

- Full Stack Web Development – Coursera (Google IT Program)
- Cloud Computing & DevOps – AWS Academy
- Advanced JavaScript & Node.js – Udemy
- Python for Automation & AI – edX (Harvard CS50P)
- Database Design & SQL Optimization – Pluralsight

Projects & Open Source Contributions

Organizr – https://organizr.app

- Open-source dashboard for managing self-hosted services
- 200M+ Docker pulls, 4,000+ GitHub Stars
- Features OAuth authentication, API integrations, and custom UI

Inventory Automation System

- Built a real-time inventory dashboard for warehouse logistics

Education

- Self-Taught Software Engineer | Continuous Learning through Online Programs
- Advanced Training in Cloud & DevOps | AWS Academy & Udemy
